## TIMBER CASEMENT

# ABOUT US

---

## At Bennbrook Windows, we pride ourselves on creating windows that last.

Using the finest materials and best practices, we have developed window systems that boost thermal efficiency, reduce noise pollution and keep properties safe and secure. That's our guarantee.

---

### Timber & Glass

We only use high quality, ethically sourced timber and modern manufacturing techniques to create our casement windows. Each unit incorporates high performance Insulating Glazing Units (IGU) from the gold standard of Saint Gobain to provide A rated energy efficiency.

# MADE TO MEASURE

---

**All of our windows are manufactured to our customers' specific specifications using CNC machining.**

All of our windows are manufactured to our customers' specific specifications using CNC machining. This means that we can guarantee your windows will provide the precise fit and finish you require. As such, this does mean that manufacturing of products can take up to (8 -12) weeks, increasing depending upon job size.

When it comes to fitting our units, we want to cause as little disruption as possible. This means that we are happy to work around your schedule, as and when it suits. First of all, our installation team will remove and dispose of all old windows, replacing units immediately to avoid leaving your property open.

All furniture and surrounding areas will be protected and mess cleared. We are covered under professional liability insurance, so in the unlikely event of a mishap or damage, all repairs will be carried out promptly.

# AFTER SALES SERVICE

---

**Our after sales service is second to none. When you buy from Bennbrook Windows it is the start of a 10 year relationship that we take very seriously.**

We appreciate that a satisfied customer will recommend us to their friends and family, so our dedicated Service Department ensures that any issues that may arise are dealt with quickly and efficiently. This department can also deals with repairs to product that we have not fitted including glazing repairs. We also have a very popular conservatory cleaning service available throughout the spring and summer months.

# OUR CASEMENT WINDOWS

- All of our timber casement windows are manufactured to rigorous testing, achieving all necessary accreditation.
- Safety is guaranteed by using friction hinges, which allow the window to stay open without the need to use a stay.
- Three layers of hardwood prevent swelling in the windows, stopping them from sticking or warping the frame.
- Carefully crafted from noise dampening, knot-free timber, each unit is fully finished in the factory with high quality top coat.
- A multi-point lock system provides the ultimate security solution and a total seal around the frame.
- All products are fully guaranteed by the manufacturer for up to 10 years.

# OUR CASEMENT WINDOWS

## TRADITIONAL MULLION OPTION

TIMBER TYPE: Softwood with Hardwood Sills

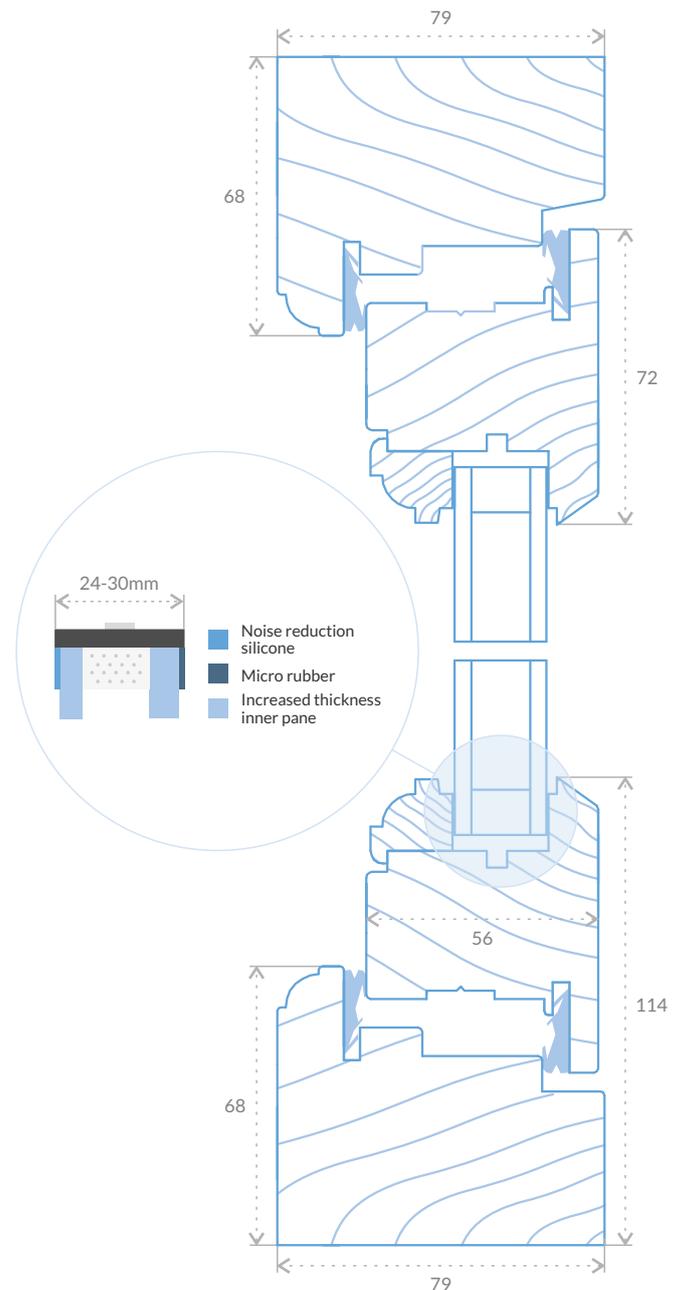

STANDARD DOUBLE GLAZING: 4/16A/4  
(SGG Planiclear)

Rising to popularity in the end of the 19th century, casement windows were once the height of sophistication; produced in a range of designs from smaller panes, to latticed works and grand gothic arches. At Bennbrook Windows we want to maintain this tradition, whilst offering staggering results in regards to preventing noise pollution!

Our line in Bennbrook Casement Windows seek to keep as close to the original as possible, only making allowances to incorporate modern technology and techniques that will enhance the noise reduction qualities and longevity of the units.

By incorporating modern micro rubber spacers between the glazing, specialist noise reduction glass, advanced weather seals and acoustic low expanding installation foams, we can boast a staggering maximum noise reduction of 40dB!

## VERTICAL CROSS-SECTION

# OUR CASEMENT WINDOWS

## TRADITIONAL MULLION OPTION

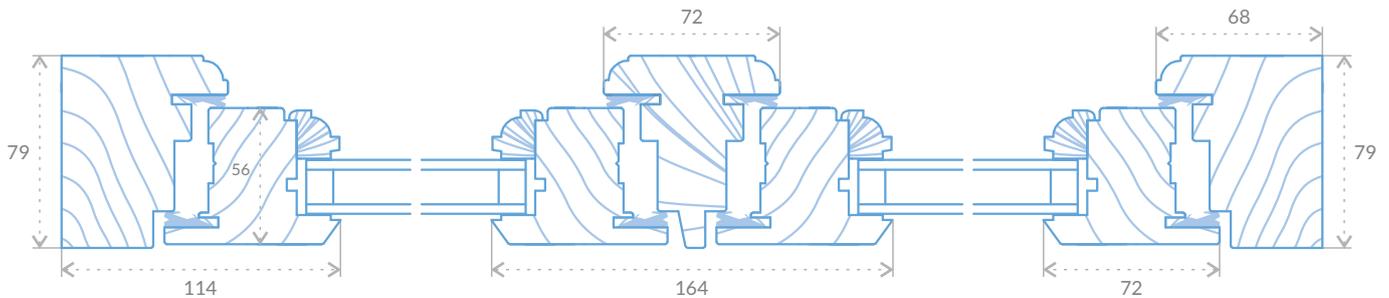

TIMBER TYPE: Softwood with Hardwood Sills

STANDARD DOUBLE GLAZING: 4/16A/4  
(SGG Planiclear)

Our casement windows are made-to-measure. Each product is equipped with friction hinges which allow windows to stay open in any position without a need of using a stay.

The windows benefit from multi-point locking system which increases safety and improves thermal performance of the window. A truly complete solution!
